Distributor Scheduling UX

Published Post

As expected, when a post gets published the Distributor menu appears in the Admin Bar.

Clicking that Distributor menu will expand out the distribution options.

🕅 🗥 My Sites 🏾 🏠 distributor multidomains	• 0 + New View Post Distributor		Howdy, jeffpaul 📃
	Distribute "Published Post" to other connections.		
	sub1.distributor-multidomains.local		
	sub2.distributor-multidomains.local	Distribute 🗹 As draft	
	sub3.distributor-multidomains.local		
	distributorremote.local		

Selecting one or more sites enables the Distribute button and "As draft" checkbox option.

🚯 🗥 My Sites 🔺 distributor multidomains	0 + New View Post Distributor		Howdy, jeffpaul 📃
	Distribute "Published Post" to other connections.		
	sub1.distributor-multidomains.local	Selected connections	
	sub2.distributor-multidomains.local	sub1.distributor-multidomains.local	
	sub3.distributor-multidomains.local	sub3.distributor-multidomains.local 🗙	
	distributorremote.local	Distribute Androft	
		As drait	

Scheduled Post

As desired, when a post gets scheduled the Distributor menu should appear in the Admin Bar.

Clicking that Distributor menu should expand out the distribution options including a "Schedule Distribution" button in place of the "Distribute" button.

Selecting one or more sites enables the "Schedule Distribution" button and "As draft" checkbox option.

🚯 🗥 My Sites 🔺 distributor multidomains	0 + New View Post Distributor		Howdy, jeffpaul 📃
	Distribute "Scheduled Post" to other connections.		
	sub1.distributor-multidomains.local	Selected connections	
	sub2.distributor-multidomains.local	sub1.distributor-multidomains.local	
	sub3.distributor-multidomains.local	sub3.distributor-multidomains.local	
	distributorremote.local		
		Schedule Distribution As draft	

Clicking the "Schedule Distribution" button will store the desired distribution mapping and when the scheduled post publishing gets triggered we then trigger the distributions as scheduled (and either "as draft" or not).
